Subject: Request for clarification versions Guidance and PDD Guidelines

Dear Mr Oderson,

Global Carbon BV herewith submits a request for clarification in accordance with the clarification procedure.

The request concerns the validity of the current and previous versions of the “Guidance on criteria for baseline setting and monitoring” and the “Guidelines for users of the Joint Implementation Project Design Project Form”. In the latter in article 8, 9 and 10 only relevant provisions indicate the validity of versions of the *JI PDD Form*.

We request the JISC to provide clarifications of the validity of the current and previous versions of the “Guidance on criteria for baseline setting and monitoring” and the “Guidelines for users of the Joint Implementation Project Design Project Form”.

We suggest introducing the same provisions that regulate versions of CDM methodologies:

*If an approved CDM baseline and monitoring methodology is used, the most recent valid version of the CDM methodology shall be applied when the project design document (PDD) is submitted for publication on the UNFCCC JI website, allowing for a grace period of two months.*

Sincerely yours,

Lennard de Klerk  
Managing Director
