

**Annex 2****DRAFT JOINT IMPLEMENTATION PROJECT DESIGN DOCUMENT (JI PDD)****Note by the secretariat**

1. The attached draft project design document for joint implementation projects (JI PDD) is a part of the preparatory work in support of the first meeting of the Joint Implementation Supervisory Committee (JISC). The basis of the draft JI PDD is:

(a) Decisions 16/CP.7 and -/CMP.1 (*Guidelines for the implementation of Article 6 of the Kyoto Protocol*) (JI guidelines), and the annexes thereto on guidelines for the implementation of Article 6 of the Kyoto Protocol;

(b) The clean development mechanism project design document form (CDM-PDD), version 02.

2. In considering the draft JI PDD, the JISC may wish to pay particular attention to the following issues:

(a) Section “A.4.2. Category(ies) of project activity” has been deleted in the draft JI PDD as no project categories have (yet) been developed for joint implementation projects;

(b) Section “A.4.5. Public funding of the project activity”, Annex 2 “Information regarding public funding” and section “G. Stakeholders’ comments” have been deleted in the draft JI PDD because they are not provided for in the JI guidelines;

(c) Section “A.5. Project approval by the Parties involved” has been added in the draft JI PDD as provided for in paragraph 31 (a) of the JI guidelines;

(d) Section “B.1. Option 1 - Description and justification of the baseline chosen”, relevant for joint implementation projects not applying an approved methodology, has been added in the draft JI PDD;

(e) Sections “B.2. Option 2 - Title and reference of the approved baseline methodology applied to the project”, “B.2.1. Justification of the choice of the methodology and why it is applicable to the project” and “B.2.2. Description of how the methodology is applied in the context of the project” of the draft JI PDD are relevant for joint implementation projects applying an approved methodology;

(f) Sections “D.1 Name and reference of approved monitoring methodology applied to the project, if applicable” and “D.1.1. Justification of the choice of the methodology and why it is applicable to the project” of the draft JI PDD are relevant for joint implementation projects applying an approved (CDM) methodology;

(g) Section “D.2.5. Information to be collected in order to monitor environmental impacts of the project, and how this information will be archived” has been added in the draft JI PDD as provided for in paragraph 4 (d) of appendix B to the JI guidelines;

(h) The draft JI PDD attached is not applicable to small-scale and LULUCF joint implementation projects. The elaboration of JI PDD for these types of projects will be undertaken after the present JI PDD has been finalised and/or subject to guidance of the JISC.

DRAFT

PROJECT DESIGN DOCUMENT FORM (JI PDD) - Version 01

Joint Implementation Supervisory Committee

page 1

**JOINT IMPLEMENTATION
PROJECT DESIGN DOCUMENT FORM (JI PDD)
Version 01 - XX Month 2006**

CONTENTS

- A. General description of the project
- B. Setting of the baseline
- C. Duration of the project / Crediting period
- D. Setting of the monitoring plan
- E. Estimation of GHG emission reductions
- F. Environmental impacts

Annexes

- Annex 1: Contact information on participants in the project
- Annex 2: Baseline information
- Annex 3: Monitoring plan

SECTION A. General description of the project

A.1. Title of the project:

>>

A.2. Description of the project:

>>

A.3. Project participants:

>>

A.4. Technical description of the project:

A.4.1. Location of the project:

>>

A.4.1.1. Host Party(ies):

>>

A.4.1.2. Region/State/Province etc.:

>>

A.4.1.3. City/Town/Community etc:

>>

A.4.1.4. Detail of physical location, including information allowing the unique identification of the project (maximum one page):

>>

A.4.2. Technology to be employed by the project:

>>

A.4.3. Brief explanation of how the anthropogenic emissions of anthropogenic greenhouse gas (GHG) by sources are to be reduced by the proposed JI project, including why the emission reductions would not occur in the absence of the proposed project, taking into account national and/or sectoral policies and circumstances:

>>

A.4.3.1. Estimated amount of emission reductions over the crediting period:

>>

A.5. Project approval by the Parties involved:

>>

SECTION B. Setting of the baseline

B.1. Option 1 - Description and justification of the baseline chosen:

>>

B.2. Option 2 - Title and reference of the approved baseline methodology applied to the project:

>>

B.2.1. Justification of the choice of the methodology and why it is applicable to the project:

>>

B.2.2. Description of how the methodology is applied in the context of the project:

>>

B.3. Description of how the anthropogenic emissions of GHG by sources are reduced below those that would have occurred in the absence of the JI project:

>>

B.4. Description of how the definition of the project boundary (related to the baseline methodology selected) is applied to the project:

>>

B.5. Details of baseline information, including the date of completion of the baseline study and the name of person(s)/entity(ies) determining the baseline:

>>

SECTION C. Duration of the project / Crediting period

C.1. Duration of the project:

C.1.1. Starting date of the project:

>>

C.1.2. Expected operational lifetime of the project:

>>

C.2. Length of the crediting period:

C.2.1. Starting date of the crediting period:

>>

SECTION D. Setting of the monitoring plan

D.1. Name and reference of approved monitoring methodology applied to the project, if applicable:

>>

D.1.1. Justification of the choice of the methodology and why it is applicable to the project:

>>

DRAFT

PROJECT DESIGN DOCUMENT FORM (JI PDD) - Version 01

D.2. Description of the monitoring plan:

D.2.1. Option 1 - Monitoring of the emissions in the project scenario and the baseline scenario:

D.2.1.1. Data to be collected in order to monitor emissions from the project, and how this data will be archived:

ID number <i>(Please use numbers to ease cross-referencing to D.3)</i>	Data variable	Source of data	Data unit	Measured (m), calculated (c) or estimated (e)	Recording frequency	Proportion of data to be monitored	How will the data be archived? (electronic/paper)	Comment

D.2.1.2. Description of formulae used to estimate project emissions (for each gas, source, formulae/algorithm, emissions units of CO₂ equ.):

>>

D.2.1.3. Relevant data necessary for determining the baseline of anthropogenic emissions by sources of GHGs within the project boundary, and how such data will be collected and archived:

ID number <i>(Please use numbers to ease cross-referencing to table D.3)</i>	Data variable	Source of data	Data unit	Measured (m), calculated (c), estimated (e),	Recording frequency	Proportion of data to be monitored	How will the data be archived? (electronic/paper)	Comment

D.2.1.4. Description of formulae used to estimate baseline emissions (for each gas, source, formulae/algorithm, emissions units of CO₂ equ.):

>>

D. 2.2. Option 2 - Direct monitoring of emission reductions from the project (values should be consistent with those in section E):

D.2.2.1. Data to be collected in order to monitor emission reductions from the project, and how this data will be archived:

ID number <i>(Please use numbers to ease cross-referencing to table D.3)</i>	Data variable	Source of data	Data unit	Measured (m), calculated (c), estimated (e),	Recording frequency	Proportion of data to be monitored	How will the data be archived? (electronic/paper)	Comment

D.2.2.2. Description of formulae used to calculate emission reductions from the project (for each gas, source, formulae/algorithm, emissions units of CO₂ equ.):

>>

D.2.3. Treatment of leakage in the monitoring plan:

D.2.3.1. If applicable, please describe the data and information that will be collected in order to monitor leakage effects of the project:

ID number <i>(Please use numbers to ease cross-referencing to table D.3)</i>	Data variable	Source of data	Data unit	Measured (m), calculated (c) or estimated (e)	Recording frequency	Proportion of data to be monitored	How will the data be archived? (electronic/paper)	Comment

This template shall not be altered. It shall be completed without modifying/adding headings or logo, format or font.

D.2.3.2. Description of formulae used to estimate leakage (for each gas, source, formulae/algorithm, emissions units of CO₂ equ.):

>>

D.2.4. Description of formulae used to estimate emission reductions for the project (for each gas, source, formulae/algorithm, emissions units of CO₂ equ.):

>>

D.2.5. Information to be collected in order to monitor environmental impacts of the project, and how this information will be archived:

>>

D.3. Quality control (QC) and quality assurance (QA) procedures are being undertaken for data monitored:

Data <i>(Indicate table and ID number e.g. 3.-1.; 3.2.)</i>	Uncertainty level of data (High/Medium/Low)	Explain QA/QC procedures planned for these data, or why such procedures are not necessary.

D.4. Please describe the operational and management structure that the project operator will implement regarding the monitoring plan:

>>

D.5. Name of person(s)/entity(ies) determining the monitoring plan:

>>

SECTION E. Estimation of GHG emission reductions

E.1. Estimated project emissions:

>>

E.2. Estimated leakage:

>>

E.3. The sum of E.1 and E.2:

>>

E.4. Estimated baseline emissions:

>>

E.5. Difference between E.4 and E.3 representing the emission reductions of the project:

>>

E.6. Table providing values obtained when applying formulae above:

>>

SECTION F. Environmental impacts

F.1. Documentation on the analysis of the environmental impacts, including transboundary impacts:

>>

F.2. If environmental impacts are considered significant by the project participants or the host Party, please provide conclusions and all references to support documentation of an environmental impact assessment undertaken in accordance with the procedures as required by the host Party:

>>
