

Annex 1

**CONDITIONS FOR ACCEPTING THE DETERMINATION REGARDING
THE PROJECT DESIGN DOCUMENT:
“0211. UTILIZATION OF COKE GAS WITH ELECTRICITY GENERATION BY TWO 6 MWE
CHP AT “ZAPOROZHCOX PLANT””**

1. The Joint Implementation Supervisory Committee (JISC) decided to accept the determination regarding the project design document (PDD) “0211. Utilization of coke gas with electricity generation by two 6 MWe CHP at “ZaporozhCox Plant””, subject to the following conditions:

- (a) The accredited independent entity (AIE), Bureau Veritas Certification Holding SAS, and the project participants (PPs), Joint Stock Company “ZaporozhCox Plant”, Ukraine and Global Carbon B.V., Netherlands, submit a corrected and updated PDD including the monitoring plan, and the determination report, in accordance with the response provided to the request for review, in order to improve the transparency, and resolve inconsistencies related to:
 - (i) The methodological aspects, including the monitoring of other fossil fuels; increase of coke over gas production; estimation and monitoring of leakage; replacement of boiler house, and external heat delivery;
 - (ii) The future plausible scenarios regarding the baseline setting;
 - (iii) The starting date of the crediting project provided in the determination report;
 - (iv) The prior consideration of the project.
- (b) The AIE and the PPs provide evidence regarding the prior consideration of the project, such as the minutes of the meeting of the ZaporozhCox Plant Technical Council of 14 January 2005 (including a translation into english) that were referenced in the response by the AIE and PPs to the request for review.
