JI activity

Reference number and title of JI activity 0025: Rudaiciai Wind Power Park Project

Parties involved in the JI activity Lithuania
Netherlands

Project participants Vydmantai wind park, UAB
Note: The project was sold and transferred by previous project participant Vejo spektras, UAB to the newly incorporated company Vydmantai wind park, UAB on 15/09/2011. The Letter of Approval issued by the Host Party DFP for Vejo spektras, UAB states in paragraph 4, that authorization is valid for the project proponent (Vejo spektras, UAB) and any future owners of the project; hence, there was no need for Vydmantai wind park, UAB to apply to DFP with the request of LoA reissuance.

Verification opinion

Please provide a verification opinion (or a reference to the verification opinion in one of the documents attached), including a statement regarding materiality and level of assurance, in accordance with the Standard for applying the concept of materiality in verifications

Bureau Veritas Certification has performed the initial 4th periodic verification of the "Rudaiciai wind power park project" Project in Lithuania, the project specific methodology. The verification was performed on the basis of UNFCCC criteria and host country criteria and also on the criteria given to provide for consistent project operations, monitoring and reporting.

The verification consisted of the following three phases: i) desk review of the project design and the baseline and monitoring plan; ii) follow-up interviews with project stakeholders; iii) resolution of outstanding issues and the issuance of the final verification report and opinion.

The management of Vydmantai wind park, UAB is responsible for the preparation of the GHG emissions data and the reported GHG emissions reductions of the project on the basis set out within the project Monitoring Plan indicated in the final PDD version 05 (dated April 2008) and monitoring plan revision indicated in the Monitoring report Annex1 (dated 03/02/2012). The development and maintenance of records and reporting procedures in accordance with that plan, including the calculation and determination of GHG emission reductions from the project, is the responsibility of the management of the project.

Bureau Veritas Certification verified the Project Monitoring Report version V.02 (dated 03/02/2012) for the reporting period as indicated below. Bureau Veritas Certification confirms that the project is implemented as planned and described in approved project design documents. Installed equipment being essential for generating emission reduction runs reliably and is calibrated appropriately. The monitoring system is in place and the project is generating GHG emission reductions.

Bureau Veritas Certification can confirm that the GHG emission reduction is accurately calculated and is free of material errors, omissions, or misstatements. Our opinion relates to the project's GHG emissions and resulting GHG emissions reductions reported and related to the approved project baseline and monitoring, and its associated documents. Based on the information we have seen and evaluated, we confirm, with a reasonable level of assurance, the following statement:

Reporting period: From 01/01/2011 to 31/12/2011

Baseline emissions	:	43954 t CO2 equivalents.
Project emissions	:	0 t CO2 equivalents.
Emission Reductions (Year 2011)	:	43954 t CO2 equivalents.
