TÜV Rheinland (China) Ltd. (TÜV Rheinland) has performed the initial and first periodic verification of the emission reductions generated by the JI project "Complex of measures, directed on decreasing GHG in atmosphere due to waste heaps burning" for the period from 01/03/2008 till 30/11/2012.

The project participants are responsible for the collection of data in accordance with the monitoring plan and the reporting of GHG emissions reductions from the project.

It is TÜV Rheinland's responsibility to express an independent verification opinion - conclusion on the verified amount of emission reductions from the project.

TÜV Rheinland has conducted the verification on the basis of the monitoring plan contained in the registered Project Design Document version 2.5 dated 19/11/2012 and the Monitoring Report version 2.1 dated 26/12/2012.

The verification included the assessment of:

- Project implementation in accordance with the Project Design Document (PDD);
- Compliance with the monitoring plan;
- Calculation of emission reductions and expression of a conclusion with a reasonable level of assurance about whether the reported GHG emission reduction data are accurate and free of material errors, omissions, or misstatements;
- Quality and management of data and verification that reported GHG emission reductions data is sufficiently supported by evidence.

TÜV Rheinland's (China) Ltd. (TÜV Rheinland) verification approach draws on an understanding of the risks associated with reporting of GHG emission data and the controls in place to mitigate these. TÜV Rheinland planned and performed the verification by obtaining evidence and other information and explanations that TÜV Rheinland (China) Ltd. (TÜV Rheinland) considers necessary to give reasonable assurance that reported GHG emission reductions are fairly stated, accurate and free of material errors, omissions, or misstatements.

In TÜV Rheinland (China) Ltd. (TÜV Rheinland) opinion the emission reductions generated by the JI project "Complex of measures, directed on decreasing GHG in atmosphere due to waste heaps burning" for the period from 01/03/2008 till 30/11/2012 are fairly stated, accurate and free of material errors, omissions, or misstatements in the monitoring report, version 2.1 dated 26/12/2012.

The GHG emission reductions were calculated correctly on the basis of the registered project design document version 2.5 dated 19/11/2012.

TÜV Rheinland (China) Ltd. (TÜV Rheinland) is able to verify that the emission reductions generated by the JI project "Complex of measures, directed on decreasing GHG in atmosphere due to waste heaps burning" for the period from 01/03/2008 till 30/11/2012 amount 3 499 996 tonnes of CO₂ equivalent.
