August 8, 2007

Dear Sirs,

On behalf of the equity investors of the Sudenai and Lendimai Wind Power Joint Implementation Project we hereby confirm that the basis for the decision to finance the implementation of the project is a financial analysis that has been forwarded to you on May 23 2007 and that assumes an annual energy yield of 33,708 MWh (P50).

The estimate derives from an independent analysis of EMD International A/S that was prepared on May 7. Thus our first internal energy yield estimate of 41,500 MWh that was used in the business plan and that was based on no scientific modeling was considered preliminary for both equity and loan investors who were aware of the high probability of revision of the estimate. The contract with Enercon for wind turbine delivery signed on 24.08.2006 was not based on the ultimate decision to invest in the wind farm but in order to obtain an extension to the permits to increase the (wind power) generating capacity at the two sites.

Best regards,

A handwritten signature in blue ink, appearing to be 'MK', with a long horizontal line extending to the right.

Martin Kruus
Chairman of the board
