and issuance of the final verification report and opinion. The management of UAB Iverneta is responsible for the preparation of the GHG emission data and the reported GHG emission reductions of the project on the basis set out within the within the project Monitoring Plan indicated in the final PDD version 1.7 (dated 26/05/2011). The development and maintenance of records and reporting procedures in accordance with that plan, including the calculation and determination of GHG emission reductions from the project, is the responsibility of the management of the project.

Bureau Veritas Certification verified the Monitoring Report version 1 (dated 26/02/2013) for the reporting period as indicated below. Bureau Veritas Certification confirms that the project is implemented as planned and described in the approved project design documents. The installed equipment being essential for generating emission reduction runs reliably and is calibrated appropriately. The monitoring system is in place and the project is generating GHG emission reductions.

Bureau Veritas Certification can confirm that the GHG emission reduction is accurately calculated and is free of material errors, omissions, or misstatements. Our opinion relates to the project's GHG emissions and resulting GHG emission reductions reported and related to the approved project baseline and monitoring, and its associated documents.
