### Verification opinion

Please provide a verification opinion (or a reference to the verification opinion in one of the documents attached), including a statement regarding materiality and level of assurance, in accordance with the Standard for applying the concept of materiality in verifications

TÜV Rheinland Group/TÜV Rheinland Ukraine has performed the initial and first periodic verification of the emission reductions generated by the JI project "Dismantling of waste heap at former mine

"ROZSYPNYANSKA-1" " (ITL Project ID UA1000317) for the period from 01/10/2008 till 31/12/2011.

The project participants are responsible for the collection of data in accordance with the monitoring plan and the reporting of emission reductions generated by the project.

It is responsibility of TÜV Rheinland Group/TÜV Rheinland Ukraine to express an independent verification opinion - conclusion on the verified amount of emission reductions generated by the project and reported by the project participants through the monitoring report, version 2.0 dated 10/04/2012.

TÜV Rheinland Group/TÜV Rheinland Ukraine has assessed the monitoring report on the basis of the monitoring plan contained in the registered project design document version 2.0 dated 05/04/2012 and the monitoring report version 2.0 dated 10/04/2012.

The verification included the assessment of:

project implementation in accordance with the project design document (PDD);

compliance with the monitoring plan;

• calculation of emission reductions and expression of a conclusion with a reasonable level of assurance about whether the reported emission reductions data are accurate and free of material errors, omissions, or misstatements;

• quality and management of data and verification that reported emission reductions data is sufficiently supported by evidence.

TÜV Rheinland Group/TÜV Rheinland Ukraine verification approach draws on an understanding of the risks associated with reporting of GHG emission data and the controls in place to mitigate these. TÜV Rheinland Group/TÜV Rheinland Ukraine planned and performed the verification by obtaining evidence information and explanations that TÜV Rheinland Group/TÜV Rheinland Ukraine considers necessary to give reasonable assurance that reported emission reductions are fairly stated, accurate and free of material errors, omissions, or misstatements.

In TÜV Rhein and's Group/TÜV Rheinland's Ukraine opinion the emission reductions generated by the JI project "Dismantling of waste heap at former mine "ROZSYPNYANSKA-1" " (ITL Project ID UA1000317) for the period from 01/10/2008 till 31/12/2011 are fairly stated, accurate and free of material errors, omissions, or misstatements in the monitoring report, version 02.0 dated 04/04/2012. The verification of the project resulted in 16 Correction Action Requests and 5 Clarification Request (refer to Annex A to Verification report).

The GHG emission reductions were calculated correctly on the basis of the registered project design document version 2.0 dated 05/04/2012.

TÜV Rheinland Group/TÜV Rheinland Ukraine is able to verify that the emission reductions generated by the JI project "Dismantling of waste heap at former mine "ROZSYPNYANSKA-1"" (ITL Project ID UA1000317) for the period from 01/10/2008 till 31/12/2011 amount 991,475 tonnes of CO<sub>2</sub> equivalent.
