

**PROJECT  
DEVELOPER  
FORUM**

**UNFCCC  
Technical Workshop on JI  
Kiev**

9<sup>th</sup> September 2009

**Martin Enderlin**

Chair, Project Developer Forum

Director, Government & Regulatory Affairs, EcoSecurities

# Interactions between Parties, IEs and PPs

- **Need for interaction ?**
- **Why ?**
- **With whom ?**
- **How / what kind of ?**
- **What is PD Forum ?**

# Interactions between Parties, IEs and PPs

## – **Need for interaction ?**

=> JI is a similarly complex instrument like CDM with more flexibility and less guidance...

=> Apart from experience there are rational arguments, why there is a need for enhanced interaction ...

# Interactions between Parties, IEs and PPs

## – Why ?

- increase in number project activities (>185 published)
- increase in complexities (JI /CDM as mechanisms grew dramatically, and so did methodologies/guidance/tools etc.)
- increased time pressure (only 39 month left...)
- in reality project activities develop not as described in PDD with technical challenges in the details (implementation & monitoring)
- information asymmetry / knowledge gap between PP/PDs and regulator/parties (Secretariat/DFPs/negotiators), within JI&CDM (KP and post-12)
- overstretched extended arm (IE)
- prepare for post-12 improvements

# Interactions between Parties, IEs and PPs

## – **With whom ?**

- PPs/PDs at the lowest end of the multilevel approval/assessment chain involving many stakeholders:

Parties – DFPs – IE – JISC/AP/Secret – PPs/PDs

- Is the panel complete ? Where are Parties, but even more where are DFPs and JISC members and - not least - the Secretariat ?

- Are they all in the audience ?

=> Let's keep it interactive then !

# Interactions between Parties, IEs and PPs

## – How/what kind of ?

- Ways and means how to enhance interaction depends on the goal (general capacity building vs. improve regulation vs. problem resolution to ensure appropriate decision taking),

i.e. for project developers relying on ERUs to make project additional key parameters that determine successful interaction are:

- Speed, access to info/counterparty
- Responsiveness/interaction
- Efficiency

# Interactions between Parties, IEs and PPs

- more Q&A during meetings/sessions ? => limitations regarding deepness/level of substance, efficiency (10pax & 100 pax)
- open workshops ? => better balance, still travelling costs prevent broad regional participation
- regular focused workshops / stakeholder meetings (as under CDM) with designated counter parties that ensure wider information dissemination (self regulated/organized organizations, like IE Forum) ?
- but also other means: electronic fora, regular conference calls, simple direct interaction channels, such as  
... telephone (!)

# Aims of the PDF

**UK registered non-profit company with Articles of Associations and membership rules to ensure transparency and due process open to all stakeholders of offset projects that agree with basic principles.**

- Interact with the regulator (CDM EB/ JISC) to be constructive on rules and regulations
- Participate in improving the efficiency and function of the regulatory system
- Improve policy and regulatory standards while preserving the environmental integrity of the system
- Update and support independent standards and codes of conduct for project developers

# Board & Founding Members (skipped)

## Board of Directors

- Chair: Martin Enderlin, Ecosecurities
- Vice Chair: Leo Perkowski, AES Ltd
- Vice Chair: Andrew Prag, Camco

## Other Founding Members

- Climate Change Capital
- First Climate
- ICECAP
- EEA
- Sindicatum Carbon Capital
- Tricorona

## Currently 23 Members (Sept. 09)

- > 700 carbon professionals working in offsets from DC, EIT, dc
- > 600 registered UNFCCC projects (CDM/JI), i.e. about 1/3 market share

- AES Climate Solutions
- Agrinergy Pte Ltd
- Camco
- Carbon Fix e.V.
- Carbon Resource Management
- Center for Environment and Economy
- Climate Change Capital
- Cool NRG
- C-Quest Capital LLC
- CVDT Consulting B.V.
- EcoPart Assessoria em Negocios Empresariais Ltda
- EcoSecurities Group plc
- EEA Group
- Limited Emergent Ventures India Pvt Ltd
- FirstClimate
- Green Gas
- International Millennium Development Goals Carbon Facility (MDG Carbon Facility)
- Mitsubishi Corporation
- N.serve Environmental Services GmbH
- Sindicatum Carbon Capital
- South Pole Carbon Asset Management Ltd
- Sustainable Environmental Solutions
- Tricorona AB
